Bingo showdown game

If there's a way Texans like things, that's great. Big cars, big barbecue, and big steer horns on the hood of El Dorado. OK, maybe that's a bit stereotypical, but it's certainly a fact that two big Texas companies, Dell and Compaq, served a few very large laptops. And when we say big, we mean big. Both Dell's Inspiron 8200 and Compaq's Presario 2800 won't win any awards for their svelte numbers. But they filled a ton of horsepower and functionality suitable for some serious games in large laptop form factors. Both systems are currently shipping, and note that PC Magazine conducted a general review of the Dell Inspiron 8200 last month. Dell Inspiron 8200Compaq Presario 2800We are going to kill two stones with a bird in this review. Not only do we get to have two very well equipped laptops to square off and unlock antlers, but we're going to have ATI and nVidia duke it out as well with their latest mobile 3D graphics offerings. So we will do this tag-team style, with Dell and nVidia in one corner, and ATI and Compaq in the other. Compaq uses an ATI Mobility Radeon 7500, and Dell uses a nVidia GeForce4 440 Go. Fortunately, the laptop gods have found it appropriate to smile at us, and these two machines have identical core components, including a Pentium 4-M 1.7GHz CPU, Intel 845MP chipset, and 256MB DDR system memory. There are some important differences besides graphics chips to note as well, but having cpu, chipset, and memory line up exactly lets us focus our attention on the matchup between ATI and nVidia. Given their highly comparable component load-outs, the main differentiating factors between these mobile mashers are 3D performance, features and price. But is there a clear winner? Does one machine tower over the other, beat the chest on defeating its enemy? Is one machine doing an end-zone happy dance while the other sits on the sidelines with his head in his hands? And can I concoct other hyperbolic metaphors as blatantly absurd as the last two? For the answers to these and other pressing questions, read on... If there's a way Texans like things, that's great.
